

GERSHON TETTEH AMANOR

Data Scientist | Actuarial Analyst | Statistical Researcher

Achimota, Accra, Ghana | +233 248033482 | gershontettehamaanor@gmail.com | gtamanor002@st.ug.edu.gh
[GitHub](#) | [LinkedIn](#) | [RPubs](#) | Kaggle: Active Member

PROFESSIONAL SUMMARY

Results-driven BSc Actuarial Science graduate (Second Class Honours, Upper Division) from the University of Ghana with hands-on experience in statistical modelling, machine learning, and data-driven research. Skilled in Python, R, SQL, Power BI, and LaTeX, with a strong track record in time-series forecasting, economic analysis, and predictive analytics. Active on GitHub and RPubs, demonstrating a commitment to reproducible, open science.

EDUCATION

BSc. Actuarial Science — Second Class Honours (Upper Division)

2022 – Sep 2025

University of Ghana, Legon, Accra

- GPA: 3.55 / 4.00
- Relevant coursework: Statistical Modelling, Time Series Analysis, Risk Theory, Regression Analysis, Financial Mathematics, Probability & Stochastic Processes

WASSCE — General Science

2018 – 2021

Achimota Secondary School, Accra

TECHNICAL SKILLS

Programming	Python, R, SQL, HTML/CSS (basic)
Data & BI Tools	Microsoft Excel (Advanced), Power BI, Tableau
ML & Statistics	Scikit-learn, Tidyverse, ARIMAX/ARIMA, Regression, Decision Trees (ID3), Random Forest, SVM, Logistic Regression, Clustering
Document Tools	LaTeX (Certified — University of Ghana), R Markdown, Microsoft Office Suite
Platforms	GitHub (22+ repos), Kaggle, RPubs
Soft Skills	Leadership, Research Assistantship, Teamwork, Communication, Adaptability

PROJECTS

ARIMAX Forecasting of Ghana Government Expenditure

2025

Published on RPubs | Full reproducible code on GitHub

- Built an end-to-end ARIMAX time-series model in R to forecast Ghana's government expenditure, incorporating exogenous macroeconomic variables.
- Conducted stationarity testing (ADF/KPSS), multicollinearity diagnostics, and systematic model selection (AIC/BIC) to ensure robust specification.
- Generated a 10-year fiscal forecast with confidence intervals to support government budget planning and policy analysis.
- Published full reproducible analysis on RPubs and GitHub for open access.

Drivers of Economic Growth in Ghana — AHIES Data Analysis

2024

University of Ghana | R

- Analysed the Annual Household Income and Expenditure Survey (AHIES) dataset to identify key socioeconomic predictors of economic growth in Ghana.
- Applied multivariate regression and variable selection techniques in R to derive actionable policy insights.

Stroke Prediction Using Machine Learning Algorithms

2024

GitHub Repository | Python / Scikit-learn

- Compared Logistic Regression, Random Forest, and SVM classifiers to predict stroke risk using a clinical dataset.
- Performed feature engineering, class-imbalance handling, and model evaluation (ROC-AUC, F1-score, confusion matrix).
- Published reproducible code on GitHub as a public repository.

H1N1 Vaccine Classification — ID3 Decision Tree (STAT 230)

2023

Published on RPubS | R

- Implemented the ID3 algorithm from scratch in R to classify H1N1 vaccine uptake, using entropy and information gain for node splitting.
- Achieved interpretable classification results; published full analysis on RPubS.

WORK EXPERIENCE

Teaching Assistant — R Programming & Statistics

Nov 2025

University of Ghana, Legon

- Facilitated practical R programming and statistics sessions for undergraduate students.
- Supported research and graduate assistantship activities within the Department of Statistics & Actuarial Science.

Data Analyst Intern

Oct 2025 – Dec 2025

Ghana Statistical Service

- Analysed national datasets and produced statistical reports to inform policy decisions.
- Automated complex sampling workflows using R, significantly reducing manual processing time and improving efficiency.

Statistical Methods Intern

Sep 2024 – Nov 2024

Ghana Statistical Service

- Applied advanced sampling methodology and survey design techniques using R for national surveys.
- Conducted data quality checks and validation to ensure accuracy of published statistics.

Sales & Marketing Intern

Mar 2024 – Apr 2024

Impact Life Insurance Company

- Marketed insurance products to clients, strengthening communication, client relations, and commercial awareness.

Data Collection & Analysis Intern

Aug 2023 – Sep 2023

Ghana Statistical Service

- Assisted in national data collection, analysis, and report development under senior statisticians.

Data Collection & Analysis Intern

Nov 2022 – Dec 2022

Ghana Statistical Service

- Collaborated with the team to analyse data and develop reports; organised data files and spreadsheets.

CERTIFICATIONS & ACHIEVEMENTS

- **Certificate of Participation:** LaTeX Proficiency Training — Dept. of Statistics & Actuarial Science, University of Ghana (Mar 2026)
- **Kaggle Recognition:** 1 Year on Kaggle Badge — Kaggle (February 2026)
- **Kaggle Recognition:** Vampire Badge — Kaggle (February 2025)

- **Kaggle Recognition:** Kaggle Community Member Badge — Kaggle

LEADERSHIP & EXTRACURRICULAR

- Vice President — Christian Students on Campus (CSOC), University of Ghana
- Course Representative — Risk Management & Insurance, University of Ghana (2024)
- House Prefect — Achimota Secondary School (2020–2021)
- Club Representative — Givers Never Lack Club, Achimota School (2019–2021)
- Sanctions Monitor — Achimota School (2019)
- Senior Boys' Prefect — New Ningo D/A Basic 'A' School (2014–2015, 2017–2018)

LANGUAGES

English (Fluent) | Dangme (Native)
